divlynx

social design guide · v1

the design is called

The Black Sketchbook.

How to design Divlynx posts for Instagram so they look like they came from the same hands as the website: what the idea is, which colours and fonts to use, the hand-drawn elements, and ready-made post layouts.

in one line

A black page, clean type, annotated by hand in orange marker.

For the social media team · Matches divlynx.com · Fonts free on Google Fonts

Why a sketchbook?

Divlynx finds the busywork draining a team and replaces it with AI automation. A sketchbook is where that thinking happens: you **write down the problem**, **cross it out**, and **sketch the fix**. Every post should feel like a page from that book.

the three ingredients

1. A black page

Near-black background with a faint dot grid, like a dotted sketchbook page. Never a white background.

2. Clean, confident type

Big, tight headlines in Funnel Display. The type does the serious work and looks professional.

3. Notes by hand in orange

Orange marker strokes, handwritten labels, sticky notes. These add the human, "we thought about this" feel.

the story every post tells

~~The pain: something done by hand~~

→ the fix: automated

The value: hours back, no missed leads

the feeling we want

Smart, human, a little playful. Like a senior engineer explaining your problem on a whiteboard. Not corporate. Not "AI robots and blue glow".

Black and orange. That's it.

Orange is the logo's colour. Use it like a marker: for the one thing you want people to notice. Everything else is black and warm white.

page

RGB 166 163 155
Smaller supporting text

marker

Divlynx Orange
#F78400
RGB 247 132 0
Marks, notes, buttons

how much of each

About **65% black** · **23% white text** · **12% orange**. If a post looks mostly orange, flip it to an orange "field" post (black text on orange), but never mix big orange areas with lots of orange text.

sticky-note papers

#FFB347
Amber note

#F6EFDF
Cream note

#FFD3A3
Peach note

Text on notes is always dark ink `#1D150C`, never white.

Three fonts, three jobs.

All free on Google Fonts (fonts.google.com). Install them in Canva or Figma before designing.

headlines

Funnel Display

Your business runs on autopilot.

SemiBold (600). Big and tight: letter spacing −3 to −4%, line height 95–100%. Max 8 words.

body text

Funnel Sans

We find the tasks draining your team and hand them to AI agents.

Regular (400) and **Medium (500).** For sentences and explanations. Line height 140–150%.

handwritten notes

Gochi Hand

autopilot.

Regular, in orange (or dark ink on sticky notes). Only for **short notes of 1–5 words**: labels, dates, captions, arrows' text.

sizes on a 1080 × 1350 post

Headline	Funnel Display 600	110–150 px
Sub-headline	Funnel Display 600	56–72 px
Body	Funnel Sans 400	34–40 px
Hand note	Gochi Hand	44–70 px
Small print	Geist Mono 400 (optional)	24–28 px

rules

- ✓ One headline per post. Everything else is clearly smaller.
- ✓ Never write a paragraph in the handwriting font.
- ✓ Never use gradient text, outlines or drop shadows on type.
- ✓ Nothing smaller than 24 px on a 1080 px post. People read on phones.

The hand-drawn elements

Draw them by hand (iPad + Procreate, or a brush tool) so the lines wobble a little. Perfect vector shapes look fake.

marker underline

run it

Under the key word of a headline.

marker circle

No black boxes

Around a word you want to stress. Loose, overlapping ends.

strike + correction

~~busywork~~ ^ autopilot

Cross out the pain, write the fix.

highlighter

tasks draining your team

For a phrase inside body text. Once per post.

sticky note + pin

client quote

Quotes, tips, the "value" message.

notebook page

to-do

~~Copy leads to CRM~~

Lists, checklists, steps.

ticks & arrows

Checked boxes, arrows from problem to fix, asterisk separators.

dot-grid page

Every background. Dots very faint (6–8% white).

Sketch with restraint

The hand-drawn layer is the seasoning, not the meal. Too many doodles and it looks cluttered and childish.

do

- ✓ **One** marker stroke per headline (underline, circle *or* strike).
- ✓ **Max 3** hand-drawn elements per post (e.g. one underline + one note + one arrow).
- ✓ Keep lots of empty black space. Let the headline breathe.
- ✓ Tilt notes and stickers slightly (1–4°). Never more than 5°.
- ✓ Use orange for marks and notes; keep headlines warm white.
- ✓ Put the logo small in a corner on every post.
- ✓ Always follow the story: **pain** → **fix** → **value**.

don't

- ✗ No white or light backgrounds, no other brand colours (blue, purple, green).
- ✗ No gradients on text, no glows around text, no neon "AI" effects.
- ✗ No stock photos of robots, circuit brains or handshakes.
- ✗ No emoji as decoration. Use the hand-drawn marks instead.
- ✗ No paragraphs in handwriting; no more than 2 fonts besides the hand font.
- ✗ Don't stretch, recolour or add effects to the logo.
- ✗ Don't invent numbers. Only use stats we can prove (30+ projects, 20+ clients).

Two logos, both on black

Files are in the website repo under `docs/brand/` (full size, transparent).

horizontal · default

Corner of every post (top-left or bottom-left), headers, stories. File: `divlynx-logo-horizontal-master.png`

stacked · for square spaces

Profile picture, highlight covers, end slide of a carousel. File: `divlynx-logo-stacked-transparent-master.png`

Clear space

Keep empty space around the logo at least the height of the "d" in divlynx.

Size on posts

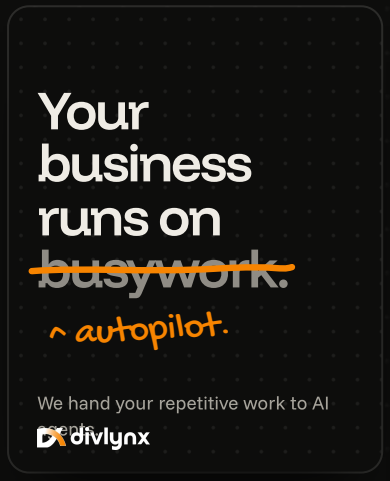

Horizontal logo about 180–220 px wide on a 1080 px post. Small and calm, never the hero.

Profile picture

Stacked logo centred on Sketchbook Black (#0D0D0C), or the mark alone on the orange gradient master.

Five posts to start with

Feed posts at **1080 × 1350** (4:5). Each one tells the pain → fix → value story in its own way.

1 · The edit

Pain struck out, fix written in. Best for bold statements.

2 · The checklist

Carousel: one pain per slide, crossed out, fix in handwriting.

3 · The pinned note

Real client quotes only, on a sticky note with a pin.

4 · The number

One proven stat, huge, with one marker stroke.

5 · The orange field

Tips and journal posts. Black text on orange; use sparingly (1 in 4 posts).

How we sound

Short, plain and specific. Name the pain the reader feels, then the value they get. No hype words.

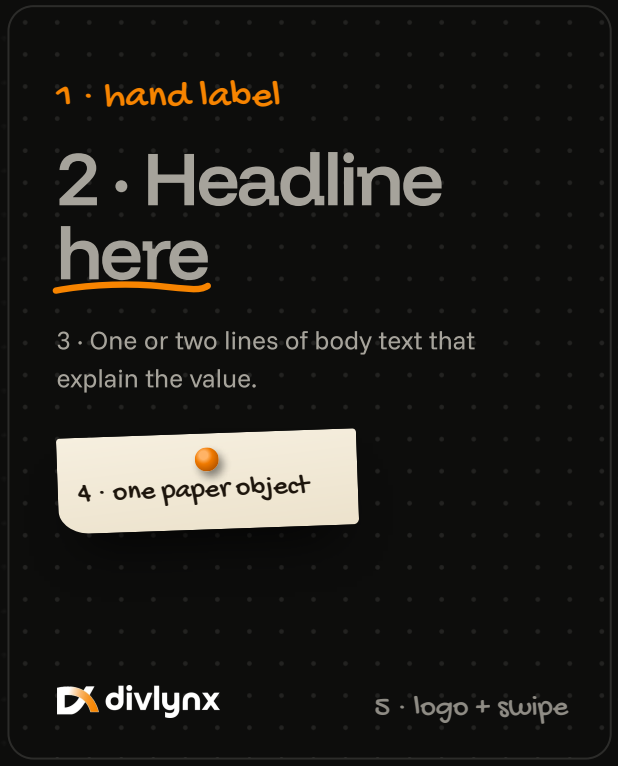

say

- ✓ "Calls after 6pm go to voicemail. Not anymore."
- ✓ "Stop copying leads into your CRM."
- ✓ "Your Monday report, in your inbox at 9am."

avoid

- ✗ "Revolutionary AI-powered synergy solutions"
- ✗ "Unlock the future of work 🚀🤖"
- ✗ Claims or numbers we can't prove

anatomy of a 1080 × 1350 post

Margins: **at least 80 px** on every side. Keep text out of the bottom 150 px of Reels covers.

The checklist

- [x] Black dotted background (#0D0D0C)
- [x] Headline in Funnel Display, warm white, 8 words or fewer
- [x] Exactly one marker stroke on the headline
- [x] Handwriting only for short orange notes
- [x] 3 hand-drawn elements or fewer
- [x] Tells the story: pain → fix → value
- [x] Logo small in a corner
- [x] Text at least 24 px and readable on a phone
- [x] Any number or quote is real and approved

quick reference

Name: The Black Sketchbook

Idea: a black page, clean type, annotated by hand in orange marker

Colours: `#0D0D0C` · `#EFECE5` · `#F78400`

Fonts: Funnel Display · Funnel Sans · Gochi Hand

Story: pain → fix → value

Website: divlynx.com, open it when in doubt

When in doubt

Remove one thing. A calm black page with one orange mark beats a busy one every time.
